

HINTS FOR HOMEOWNERS

What's Cooking In Cooking

(NAPSA)—There are a variety of reasons people are changing their kitchen design. One reason may be to keep up with the latest trends.

New trends in kitchen design include adding triple sinks, double dishwashers and mini burners.

What really changed the face of kitchen design was the top-performing, glass-ceramic panel ranges. These ranges are sleek and attractive, cleanable, versatile and durable.

Smoothtop range appliances offer an interesting alternative to conventional ranges and single hot plates.

They are highly resistant to stains, scratches and temperature shocks. They are easy to clean, so even after years of spills and splatter, cooktops with Ceran® glass-ceramic panels by Schott will still look sleek and beautiful. They are engineered to stay that way even after years of performing. They quickly respond to changes in heat settings. When the cooktop is not operational, the perfectly smooth, flat panel doubles as an extra work area.

Over 45 million homes around the world enjoy these innovative range tops. Many say that aside from having a beautiful look for their kitchen, they enjoy more space, efficiency and easier clean up.

Safety is ensured by clearly visible burner rings and by a resid-

Home, home on the range—many consumers prefer the look and convenience of a range made of glass-ceramic panels.

ual heat indicator, which stays on until the cooking zone has cooled down and is safe to touch.

As for those who have a white kitchen, they may want to select a free-standing range with Schott's new white glass-ceramic ARCTIC-FIRE™. This material gives a clean, white appearance and is as easily cleaned as the black Ceran®.

For over 25 years, Schott has been providing the appliance industry worldwide with a variety of special glass and glass-ceramics for major appliances, as well as a wealth of cooking systems experience and customer support.

To find out how you can get cooking with these new range tops, visit the Schott Web site at www.us.schott.com/hometech. For a copy of the brochure, Ceran® Questions and Answers, send requests to: Schott Corporation, 3 Odell Plaza, Yonkers, NY 10701. You may also download a copy of the brochure on the Web site.
