Professional Haircolor

(NAPSA)—When you get your hair colored at a salon, you get shimmering, long-lasting haircolor that looks terrific with your skin tone and eye color. You get healthy, shiny locks that are more manageable than ever.

Would you like to be a fiery red-head? A flaxen blonde? A toffee-toned brunette?

When you choose a Goldwell professional haircolorist, you get:

- A custom shade created just for you. Your colorist will customize a unique color formula and determine how it will look when applied over your existing color.
- Highlights just where you want them.
- Haircolor that complements your cut.
- Natural-looking, long-lasting gray coverage. Gray hair is resistant to color. A Goldwell colorist can make your new color look shiny, healthy and youthful.
- High-fashion color without the worry. Goldwell colorists can create revved-up reds, butter-scotch blondes and even hot pinks—if that's what you want.

For a professional colorist near you, call 1-888-881-0330 or visit www.goldwellusa.com.
