

# Spotlight On Skin Care

## Effective Delivery Of Highly Concentrated Anti-Aging Facial Serum

(NAPSA)—People looking for a few pearls of wisdom about retaining their natural beauty may be interested in a different kind of pearl—one that delivers proven benefits for the skin.

Developed in Italy, Perlabella PureDose Pearls bring the latest in Italian skin care technology to America. These capsules are unique because they're airtight, making it impossible for water, air or preservatives to compromise the integrity of their ingredients—some of the most trusted compounds in anti-aging skin care. The ingredients in each pearl are as fresh as the day it was created in Italy.

### Retinol Face—Wrinkle Fighting

Retinol, a pure and active form of vitamin A, works beneath the skin surface to promote plumper, healthier skin cells. It stimulates collagen production, giving you the appearance of smoother, firmer skin.

Retinol is very effective against wrinkles, but the effectiveness depends on its integrity and purity. Perlabella Retinol Face PureDose Pearls are encapsulated in the patented Microsponge system, which provides a time-released delivery of retinol into the skin. The Microsponges are spherical, enabling them to easily find their way to wrinkles and other damaged areas.

### Q10 Face—

#### Regenerating/Repairing

Our bodies naturally produce coenzyme Q10 for energy as well as for its antioxidant nature. However, as we age, our bodies produce less. Inside every Perlabella Q10 Face PureDose Pearl is a single

**A new kind of skin care technology helps promote younger, healthier-looking skin.**

dose of serum that glides on effortlessly leaving skin feeling silky smooth. This highly concentrated form of coenzyme Q10 helps boost skin repair and regeneration and protects skin against free radicals and the signs of aging.

### Vitamin C Face—

#### Brightening/Illuminating

Because the Microsponges ensure a gradual product release, the highly concentrated Perlabella Vitamin C Face PureDose is particularly effective and well-tolerated for all skin types. It protects skin against free radicals and ultraviolet light, and the inclusion of vitamin E helps to moisturize while light-reflecting pigments give skin an illuminated effect.

### Retinol Eye—

#### Wrinkle Reducing

Specially formulated with the correct amount of retinol for the delicate area around the eyes.
