

America's Top Hospitals

(NAPSA)—The formula for finding America's top hospitals is simple, say the publishers of a new book.

First you find America's top doctors and then you find out where they're practicing. Castle Connolly Medical Ltd., publisher

America's top doctors practice at top hospitals, say the experts in a new book.

of *America's Top Doctors*, recently released a list of America's 100 Top Hospitals.

John Connolly, Ed.D., president and CEO of Castle Connolly, said that the list is based on the number of physicians listed in *America's Top Doctors*.

The book lists more than 4,000 of the top referral specialists who deal with the most difficult and complex medical problems. It is to these physicians, and the hospitals they are affiliated with, that many people go—often traveling long distance—to receive the very best medical treatment.

“Top doctors practice at top hospitals,” said Connolly.

The book is available at bookstores, by calling 800-399-DOCS or visiting www.AmericasTopDoctors.com.
