

AMERICA'S HEALTHSTYLES

America's Top Doctors

(NAPSA)—Is your doctor good for what ails you? Do you have a problem or disease that needs the attention of the very best specialists? With more than 650,000 doctors in America, how do you identify the top ones?

With a helpful new book, finding the right care can be less of a bitter pill to swallow.

Fortunately, there's a book that can help readers find the best doctor. *America's Top Doctors* (Castle Connolly Medical Ltd., \$29.95) has been described as a comprehensive guide to the best physicians in the nation.

When the nature of a disease or medical condition afflicting you or a loved one warrants identifying the top doctor—the very best specialist—to diagnose or treat the problem, the book can make an overwhelming, complex, time-consuming and often frustrating search quicker and easier.

The guide profiles more than 4,200 of the top medical specialists across the nation for the treatment of more than 1,700 diseases and medical conditions.

All the doctors on the list were nominated through extensive mail and phone surveys of their peers. The book is available at bookstores, by calling 800-399-DOCS or by visiting www.AmericasTopDoctors.com.
