Practical Magic?

(NAPSA)—Magic can help you achieve realistic goals and wishes. That's the message of a fascinating new book which offers "recipes" for success, based on the centuries-old practice of witchcraft.

Spellcraft: Practical Spells for Modern Life (Penguin Compass, \$14), by Ann-Marie Gallagher, is a compendium of ancient wisdom and modern magic, divided into chapters on Career; Love; Health; Home; Family, Friends and Neighbors; and Prosperity.

By using sympathetic magic—the use of physical objects to represent magical aims—Gallagher reveals how modern-day technology, like photocopiers and e-mail, and common “ingredients” including paper clips, cotton balls, onions, rubber bands and photographs can be used to cast spells that:

- Stop gossip;
- Bring love into your life;
- Banish conflict in the workplace or at school; and
- Prevent nightmares.

With color illustrations throughout, *Spellcraft* is a treasure chest—full of enchanting spells and magical potions for novices and experienced practitioners alike. This 21st century guide to magic lets readers charm their way to success—at home, at school, or in love.

As an added value, *Spellcraft: Practical Spells for Modern Life* includes a red disk to decode hidden instructions throughout the book. It is available at bookstores or call 1-800-253-6476 to order.
