SAFETY SENSE

How Safe Is Personal Data Stored In Your Computer?

(NAPSA)—Today, theft of personal information and computer viruses are concerns on the minds of many home computer users. Intrusion by computer hackers, cyber vandals and unwanted visitors is becoming increasingly sophisticated.

As more people use the Internet to shop, stay in touch or learn, concern about hackers having unauthorized access to personal computers and the information on them is growing.

Fortunately, Computer Associates (CA), a company that has built its reputation on providing security software for worldwide corporations, has introduced a Web site that offers effective and easy-to-use security software solutions for consumers and small office PC users.

Recent terrorist events underscore the importance of having the right level of security. CA's eTrust EZ Armor is one such solution that represents a new standard in online security and data protection.

The software combines a personal firewall to secure against hackers and unwanted visitors with an antivirus and e-mail screening technology that protects against viruses, worms, zombies and Trojan horses. eTrust EZ Armor also protects computers from the receipt of destructive e-mails that could wreak havoc on your files.

Threats to online security by hackers are increasing.

People tend to shy away from complex software installations. The Web site enables people to simply point and click to download online protection in just minutes. An added benefit is the fact that registered users will be automatically notified of product updates through e-mail, as they become available. This eliminates the guesswork of whether or not your computer has the latest protection or virus signature which guards against quick-spreading computer viruses.

Based on the same security software used by companies worldwide, eTrust EZ Armor is considered a highly effective computer defense solution.

To learn more about security solutions for home/small office computer users, visit the Web site at www.my-etrust.com. Readers will receive a 20 percent discount on eTrust EZ Armor when they use this promotion code: **tryezarm01**.
