

MAKING LIFE MORE FUN

Digital Imaging

(NAPSA)—Today 40 percent of U.S. households own a digital camera; 50 percent of all camcorders in U.S. homes are digital.

According to the Consumer Electronics Association (CEA), people get digital cameras to send photos by e-mail and to post them on the Internet.

Before making the switch to digital, there are a few things to consider. First, look at the number

More and more, people see digital cameras as making photography more fun.

of pixels a camera has. Higher pixels equal better prints, but also a more expensive price tag. Also be sure to check out the peripheral devices (USB cables, docking stations, printers) you will need to print, edit and store your digital images.
