

INGENIOUS IDEAS

Functional Clothing

(NAPSA)—Forget the tuxedo. What James Bond *really* needs is a lightweight jacket that lets him plug in all those nifty gadgets that R dishes out—without any visible wires to detract from his oh-so-fashionable entrances and exits.

You don't have to be a "secret agent" to appreciate the possibilities of clothing that's tailored for modern technology, with pockets designed to accommodate cell-phones, PDAs, digital cameras, portable keyboards, GPS devices, small laptop computers and other gizmos. Functional, yet fashionable, Technology Enabled Clothing® is a terrific accessory for people who can't live without their gadgets and want to keep their hands free.

The SCOTTeVEST® Version THREE.0 allows wearer to discreetly carry and connect multiple electronic devices using a hidden, ergonomically designed pocket system, together with a Personal Area Network—hidden channels that allow users to connect devices without any visible wires.

This clothing line includes a jacket with removable sleeves, a zip-in fleece liner, a wind shirt, baseball cap and sport jacket. There are six colors to choose from. Prices begin at \$49.99. To learn more, call Technology Enabled Clothing® at (866) 909-VEST or visit the Web site at www.SCOTTeVEST.com.
