## New Drug-Free Solution Offers Hope For Allergy Sufferers

(NAPSA)—The solution to this year's allergy problems may lie in a preventative drug-free gel. This hope is good news, because experts predict that pollen counts will reach all-time highs this year due to changing weather patterns.

Two new topical allergy gels can be used in conjunction with other over-the-counter or prescription medications and can be reapplied as often as needed. The gels

**Available in small, handy tubes, the over-the-counter topical gels can be applied as needed to filter out allergens.**

filter negatively charged, airborne allergens such as pollen, ragweed, pet dander and dust mites, stopping them from entering nasal passages where they can cause allergic symptoms such as a runny nose and sneezing.

Unlike existing products that treat allergy symptoms once they have started, over-the-counter, drug-free Chloraseptic Allergen Block and Little Allergies Allergen Block, when used as directed, help prevent the start of mild nasal allergy symptoms.
