## New Guaranteed Cold Treatment

(NAPSA)—It's cold season, but who has time to lose being laid up with annoying symptoms, such as a runny nose, headache, malaise, congestion, sneezing, sore throat and coughing.

Some products offer relief, but none offer a guarantee. Some have bothersome side effects.

**You can reduce cold symptoms overnight.**

Now, a newly formulated zinc-based lozenge offers guaranteed relief of major cold symptoms in 24 hours. NO Time for Colds is a clinically tested, multi-symptom cold remedy consisting of zincum gluconicum (zinc gluconate) and sambucus nigra (flavonoids extracted from the elderberry flower).

“It helps calm the body’s over-reaction to the cold virus, lessening the severity of the symptoms and actually shortening the duration of the cold,” says pharmacist and author Lisa Chavis. “Flavonoids are naturally occurring, water-soluble plant pigments that may support health. NO Time for Colds has been shown to relieve major cold symptoms in 24 hours or the manufacturer will refund your money.”

The new product can be found in drugstores, supermarkets and mass merchandisers. Visit [www.notimeforcolds.com](http://www.notimeforcolds.com) for more information.
