## First Aid—Fast

(NAPSA)—An ingenious idea, called Speed Bandage, is helping to bring fast and convenient first aid to anyone—parent, child, or arthritis sufferer—who's ever had problems opening regular bandages or coping with minor cuts.

**On a roll—that's where you can find handy new bandages when you need one fast.**

---

You can now get adhesive bandages on a roll dispenser. There's no paper, no string, no mess, no cleanup. You just pull a bandage from the roll and place it on the wound. Sterility is guaranteed and all materials are non-allergenic and environmentally friendly.

Speed Bandage is made by Generation Healthcare Products and available in rolls of 20 at Rite Aid, Eckerd, Genovese and other stores.
