Research Shows Garlic Protects Arteries

(NAPSA)—A recent study found garlic may prevent the formation of small primary lesions that form in arteriosclerosis. Arteriosclerosis can result in heart disease, the leading killer of Americans today.

The World for Cardiovascular Health**

Exclusive LI III[®] Formula

Dietary Supplement
90 TABLETS
Standardized and Tested

Lichtwer Pharma

* This product has been clinically proven to be the most effective garlic supplement available for supporting cardiovascular health.

Good news about overcoming a killer: garlic can combat arteriosclerosis.

The research, conducted by Dr. Gunter Siegel, director of the Institute of Physiology at the Benjamin Franklin Clinic of The Free University of Berlin/ Germany, provides further evidence that taking a daily dosage of 300 mg of Kwai[®] Garlic extract may help prevent arterial plaque build-up or even reverse or disperse existing plaque.

Although there are many garlic products on the market, few are clinically proven to offer cardiovascular benefits. Kwai was the brand chosen in the study, and with its standardized Allicin content, it is specifically formulated to promote cardiovascular health. It's available in drug, food and other fine specialty stores nationwide.
