

Cordless Screw Gun Makes Ideal Gift For Father's Day

(NAPSA)—If your dad is planning to do some work around the house this summer such as installing drywall, subfloors, or other screw-fastening projects, surprise him with a Senco® DuraSpin™ DS200-14v Cordless Screw gun for Father's Day. The new cordless DuraSpin is the perfect gift for handy dads looking to simplify many home-improvement projects.

"SENCO's innovative and award winning tools have been well received by professional builders, contractors and do-it-yourselfers alike," says Senco Product Manager Bill Womacks. "Using the DuraSpin Cordless Screw gun lets any dad complete home-improvement projects as quickly as a professional."

For projects like tough drywall ceiling jobs or repetitive flooring, the Senco DuraSpin Screw gun is ideal. The gun uses a plastic strip holding 50 screws. After a screw is driven, DuraSpin automatically advances to the next one, so dad can continuously drive screws without worrying about reloading or hand feeding screws until a new strip is required. The automatic-feed feature means dad can position work materials with one hand and drive screws continuously with the other. It's a snap!

The easy-to-use cordless, collated screw gun can accommodate a wide variety of collated screws in lengths from 1" to 2" and the comfortable grip and cushioned trigger is ergonomically designed for extra comfort and better productivity with less exertion. DuraSpin features Senco's patented clutch design that extends motor and bit life by disengaging when the drive is completed, the longest-lasting drive bits available, a quick-bit release that allows dad to easily change from phillips to square

drive bits without a chuck and an adjustable depth-of-screw drive for a precise countersink.

The DuraSpin package has everything dad needs for his remodeling projects, including a spare battery, one-hour charger, a belt hook, two spare drive bits, carrying case and it all comes with Senco's standard one-year warranty. DuraSpin collated screws are also available and come in a convenient, easy-to-carry tub of 1,000 screws.

"With the new DuraSpin, dad is capable of accomplishing any task, big or small," says Womacks.

Since 1951, Cincinnati, Ohio-based Senco has been one of the world's leading manufacturers of air-powered nailers, staplers and the fasteners they drive. Senco tools are used in a variety of industries, including home construction and remodeling; cabinet and furniture assembly; manufactured housing; and industrial packaging.
