

## Going Boldly Neutral

(NAPSA)—When it comes to home decorating, what's hot now are cool neutral tones, and here's why: Neutral colors let you establish a palette for the bigger items—floors, doors, furniture and molding—that will stand the test of time. Neutrals also let you transform a room by adding vibrant pops of color through artwork, brightly painted walls, area rugs, and accessories.

**Neutral wood stains, like the gray on this desk, can help bring a peaceful calm to any room.**

### What's New In Neutrals

Even neutrals trend, however, and according to HGTV.com, the latest focus is on lighter browns and soft grays. To stay at least a step ahead of these color trends, Minwax recently introduced two new shades of its popular Wood Finish Interior Wood Stain: Weathered Oak and Classic Gray.

These soft wood-stain colors work well in all types of light and bring a peaceful calm to the room.

With this as a backdrop, you can have the freedom to be bold with the balance of the room's decor, from the paint on the walls to the fabric on your furniture.
