## Renaissance of the Roller Shade

(NAPSA)—The roller shade is back in the sun with new patterns, colors, fabrics and technology.

A good example of this is the new Remembrance® window shade which is not only affordable, it also provides a bounty of styles, opacities and updated function, thanks to a cord loop control and other new operating features.

**The old roller shade is now the new sophisticate.**

Interior designer Michael Love points out there are now 200 selections, ranging from sheer to room darkening. The new designs include fresh florals, distinctive jacquards, toiles, screen fabrics and four children's prints.

Keeping in mind children and pets, Remembrance also offers an all new spring "plus" SoftRise™ lifting option that allows the shades to easily raise and lower by a gentle tug on a decorative pull. The system enhances child and pet safety at the window by eliminating the loop control.
