## Decorative Glass To Beautify Your Door

**TIMELESS AND ELEGANT—This stylized floral Arts and Crafts design is one of the ODL Michael Graves Collection of decorative doorglass designs that provide both beauty and privacy.**

(NAPSA)—Now you can personalize your home with the design inspirations of a world-renowned architect. ODL, a 60-year leader in the doorglass industry, introduces the elegantly clean designs of the ODL Michael Graves Collection, which allow America's entryways to achieve a new level of sophistication.

The decorative doorglass designs, inspired by trends in architecture, interiors and housewares, are available in three styles: Acacia, Vienna and Fleur-de-lis.

According to architect Michael Graves, "The Acacia style was formed by my interest in the Vienna Secession design movement of the early 20th century.

The abstracted floral motifs connected vertically by parallel lines work well with any home exterior, from contemporary to traditional."

The Vienna family of decorative doorglass is representative of the cultural awareness prevalent in early 20th century Viennese art, style and design. Floral motifs were frequently used as decorative accents, and Graves uses this to accentuate America's entryways.

The Fleur-de-lis, an historic symbol of aristocracy and class, is timeless and elegant. The Fleur-de-lis will bring elegance to the entryway of any style home for years to come.
