

HINTS FOR HOMEOWNERS

A Coat That Protects Against The Elements

(NAPSA)—Consumers who want to get the most out of the metal products they buy often look for ones protected with electrocoat—e-coat, that is.

E-coat paint is a finish designed to protect products used

Used as both a primer and top coat, electrocoating uses electricity to deposit a resin and pigment finish on products.

indoors and outdoors from corrosion and other wear and tear. It can be used as a primer or a top-coat finish or both.

Products painted with electrocoat include lawn mowers, tractors, wheelbarrows, outdoor furniture, light fixtures, motorcycles, ATV's, outboard marine motors, metal furniture, washing machines, door handles, air diffusers and faucet handles.

A durable, lasting finish, it will stand up to outdoor elements such as water and sunlight or indoor environments such as chemicals used in your laundry room.
