

# Father's Day Gift Ideas

## A Gift For Every Man On The Go

(NAPSA)—This Father's Day, you can give a gift that goes beyond the traditional—and one that even the best-equipped outdoorsman, hobbyist or do-it-yourselfer can actually use on his off time. That would be a lock-back utility knife.

Every tool connoisseur knows the importance of having a well-constructed knife on hand at all times—especially a lock-back utility knife. That helps explain why the outdoor market has seen an explosion of different makes and models in the lock-back category ranging in style, color and functionality.

The newest addition to this trend is a folding lock-back that conveniently stores replacement blades in the handle, creating the quintessential knife on-the-go.

Having replacements on-hand enables users to sharpen their edge while out on the hunt, mid-project or out of reach of the tool box. The Quick Change Lock-Back Utility Knife from Sheffield Mfg., for example, is equipped with five replacement blades. It also features Sheffield's patented quick-change blade mechanism and one-handed opening. Blades can be replaced without any tools at all, enabling users to change them on the spot. The model includes a belt clip and folds to a convenient pocket size.

What's more, Sheffield has also

**A locking knife is a useful tool that makes a great gift.**

miniaturized the product into a keychain version for increased portability and convenience.

"Recent engineering advances in the industry have given utility knives renewed vigor and style," said Steve Maltese, Sheffield's director of marketing.

Sheffield™ brand utility knives are among the fastest-selling products of their kind. Manufactured by Great Neck Saw Manufacturers, the leading U.S. supplier of high-quality, affordably priced hand tools, the products can be found at AutoZone, Advance Auto Stores, Ace Hardware, Meijers, Tru-Value and Lowes and other stores, and come with a limited lifetime warranty.
