

# MAKING FAMILY LIFE MORE FUN

## Personal Watercraft Offer New and Exhilarating Way To Explore America's Waterways

(NAPSA)—With the pace of today's modern world, even families living under the same roof often find it difficult to spend quality time together. A way families are reconnecting with one another and the scenic beauty of America's waterways is with Personal Watercraft (PWC). According to industry statistics, personal watercraft are the most popular form of recreational boating in the country with sales of larger, more comfortable multi-passenger models leading the way.

Today's cleaner and quieter four-stroke PWCs, such as the Yamaha VX110 Deluxe WaveRunner, are designed with family adventure touring in mind. Extended range and fuel economy, plenty of storage, multi-passenger models and easy handling and maintenance make PWCs ideal for families interested in exploring lakes, rivers or coastlines in their area.

According to FamilyFunontheWater.com, here are a few tips to make the most out of your family WaveRunner adventure tour:

- Wear proper attire including

a properly fitted USCG approved personal flotation device (PFD)

- Keep it fun by riding responsibly and within your limits. Avoid aggressive maneuvers at all times
- Have lots of sunscreen on hand as sunlight is reflected and intensified by the water
- Bring plenty of water for you and your guests

Whether you are exploring a coastal area, river or lake, WaveRunners are a great way to spend quality time with your family. For more fun family boating ideas check out [www.familyfunonthewater.com](http://www.familyfunonthewater.com) or [www.yamahamotor.com](http://www.yamahamotor.com).
