

HINTS FOR HOMEMAKERS

Give Your Home A Burst Of Fresh Air

(NAPSA)—Cleaning experts say when it comes to clean houses, the nose knows. Many feel no matter how well maintained a house may appear, if it doesn't smell fresh, it could be cleaner.

Fortunately, a new air freshener may help make it easier than ever to keep homes smelling clean. New Glade Duet, the first 2-in-1 home air freshener, combines a continuous fragrance gel with a spray for an extra burst of scent.

That means while it helps keep a room smelling good, it can also work well for those times when an extra spritz of fragrance may be in order.

The air freshener comes in three varieties: Citrus Zest, Luscious Pear and Country Garden. The naturally inspired scents can help take care of most aromatic emergencies:

Cat Box Catastrophes

Glade Duet can help keep pet odors in their place. Just keep one near your pet's favorite areas. You may be amazed at the difference it can make.

Smokey Situations

When cigar or cigarette smoke gets in your eyes—and in your nose—a quick blast of fruity scent can help make the house smell fresh again.

New Glade Duet is the first-ever innovative 2-in-1 air freshener to combine a continuous fragrance gel with a spray for an extra burst of scent.

Kitchen Catch 22s

Culinary connoisseurs who love to cook with fresh garlic—but don't like the smell it leaves behind—may want to keep an extra air freshener in the kitchen.

Athletic Aromas

When your resident athlete's uniform carries a scent from the big game, an extra spray of air freshener can win cheers from your family—and their noses.

In addition, Glade Duet can help eliminate outdoor odors, keep laundry rooms fresh and can even work well in the garage.
