

The Movie Begins When The Lights Start To Dim

(NAPSA)—An increasing number of people are discovering that when it comes to entertainment—there's no place like home. Today, you don't have to be a millionaire to have an extraordinary home theater.

A remote-control dimmer switch can create a movie theater atmosphere in your home.

Great audio and video are crucial, but to make a home theater experience complete, dim and brighten your lights by using dimmer switches.

Dimmer switches add the dramatic "Lights! Camera! Action!" excitement that transforms the room into a true entertainment retreat. Lutron Electronics, the company that invented the dimmer switch, offers dimming products for as little as \$10 that can be purchased at local home improvement centers, lighting showrooms, or from electrical products professionals.
