

Quick Tips

(NAPSA)—These tips from experts may make cleaning your house an easier process:

- Make an appointment with yourself. Set aside a three- to five-hour block of time for cleaning each week.

Keep cleaning supplies close at hand. Use a plastic tote that contains everything needed to clean a specific room.

- When cleaning the kitchen, begin with one end of the room and work your way around to the right, top to bottom. This prevents any surface from being forgotten and any backtracking.

- Use professional strength cleaners. Zep Commercial has manufactured professional grade cleaning products for more than 65 years, and their line is available at The Home Depot.

- Hire a professional cleaning service such as Maid Brigade, which offers services across the country.
