

# Bacon Is Back

(NAPSA)—High protein, low-carb diets have brought people back to the crunchy, delicious taste of bacon. Two cooked slices have only 70 calories and 2 grams of saturated fat, making it a delicious addition to morning eggs or a protein booster for lunchtime salads. A leading national consumer magazine recently voted Boar's Head Sliced Bacon as the country's best sliced bacon, noting the subtle, smoky flavor and its ability to be cooked evenly even when crispy. Great for hors d'oeuvres and sandwiches, this high-energy food can be found in the meat or deli department in local supermarkets and delicatessens.
