

WELL OWNERS: DON'T LET DROUGHT DRAIN YOU DRY

WHEN A WELL GOES DRY IN A DROUGHT, IT MAY MEAN THE WATER TABLE DROPPED BELOW THE LEVEL OF THE PUMP, EXPLAINS THE NATIONAL GROUND WATER ASSOCIATION. DRILLING DEEPER OR IN ANOTHER SPOT MAY SOLVE THAT. MEANWHILE, A WATER METER CAN HELP YOU SEE WHERE YOU MAY BE WASTING WATER. SCHEDULING WATER-INTENSIVE ACTIVITIES SUCH AS CLOTHES WASHING, DISH WASHING, AND SHOWERS SO THEY DON'T ALL HAPPEN AT ONCE IS ALSO WISE. LEARN MORE ABOUT WATER WELL OWNERSHIP THROUGH WEBINARS, AN APP, AND INFORMATION ON WELL CONSTRUCTION, MAINTENANCE, WATER TESTING, WATER TREATMENT, AND GROUNDWATER PROTECTION AT WELL-OWNER--DOT--ORG.
