QUIET, RELIABLE POWER FOR OUTDOOR ENJOYMENT

These days, traditional hunting camps and ice fishing shanties have gone hi-tech with smartphones, tablets, T-Vs, fish finders and more powered by portable generators. According to Honda Power Equipment, producer of some of the quietest, most dependable generators, the right size depends on your needs. For lights, refrigerators and batteries, get a thousand-watt generator. For heaters, hair dryers, Crock Pots and toasters, a two-thousand-watt model, and for multiple devices, consider three-thousand watts.
