HINTS FOR HOMEOWNERS

THERE'S GOOD NEWS FOR HOMEOWNERS WHO WANT TO PROTECT THEIR FAMILY AND PROPERTY FROM THE DAMAGE AND DISCOMFORT THAT CAN BE CAUSED BY A POWER OUTAGE. INSTALLING A SIEMENS STANDBY GENERATOR CAN HELP TO PROVIDE PEACE OF MIND, SAFETY AND COMFORT BY MAINTAINING A CONTINUOUS STREAM OF ELECTRICITY DURING A POWER OUTAGE CAUSED BY EXTREME WEATHER OR OTHER EVENTS BEYOND THE HOMEOWNER'S CONTROL. UNLIKE PORTABLE GENERATORS, STANDBY GENERATORS ARE PERMANENTLY ATTACHED TO A HOME VIA A FUEL LINE AND HARDWIRED INTO THE BUILDING'S POWER SYSTEM OR PANEL BOARD. IN COMBINATION WITH AN AUTOMATIC TRANSFER SWITCH, OR A-T-S, THE GENERATOR WILL FUNCTION AS A COMPLETELY AUTOMATIC SYSTEM, WITHOUT THE HOMEOWNER HAVING TO BE THERE TO TURN ON THE GENERATOR. AN A-T-S IS DESIGNED TO TRANSFER POWER BETWEEN THE HOME'S UTILITY LINE AND THE GENERATOR. IN MANY CASES, THE COST OF THE GENERATOR AND INSTALLATION WOULD LIKELY OFFSET THE COST OF ANY POTENTIAL LOSS OR DAMAGE INCURRED BY A HOMEOWNER DURING AN OUTAGE. TO LEARN MORE, VISIT WWW-USA-DOT-SIEMENS-DOT-COM-SLASH-GENERATORS.
