HINTS FOR HOMEOWNERS

HOMEOWNERS NOW HAVE A NEW WAY TO PROTECT VALUABLE ASH TREES FROM A HIGHLY DESTRUCTIVE TREE PEST. ASH TREES CAN BE VULNERABLE TO THE EMERALD ASH BORER, WHICH HAS DESTROYED TENS OF MILLIONS OF TREES. FORTUNATELY, ONE PARTICULAR TRUNK INJECTION TREATMENT FROM ARBORJET, ADMINISTERED BY A PROFESSIONAL APPLICATOR, WILL PROTECT ASH TREES AGAINST THE PEST FOR UP TO TWO YEARS, IN MANY CASES EVEN IF THE TREES ARE CURRENTLY UNDER ATTACK. THESE TREATMENTS COST A FRACTION OF WHAT TREE REMOVAL AND REPLACEMENT DOES. FOR MORE INFORMATION, VISIT ARBOR-JET--DOT--COM.
