## COOL HOME COMFORT TECHNOLOGY

MANY HOMEOWNERS LOOKING TO STAY COMFORTABLE AND SAVE MONEY ARE HAPPILY TAPPING INTO FREE RENEWABLE ENERGY IN THEIR OWN BACKYARDS. THEY USE GEOTHERMAL. A GEOTHERMAL SYSTEM PULLS HEAT FROM THE HOUSE AND SENDS IT UNDERGROUND. THE REMAINING COOL AIR IS CIRCULATED THROUGHOUT THE BUILDING. IN COLD WEATHER, THE SYSTEM TAKES THE HEAT FROM THE GROUND AND SENDS IT THROUGH THE HOUSE AS FORCED AIR OR HOT WATER FOR RADIANT HEAT. MOST SYSTEMS CAN ALSO PROVIDE HOT WATER. LEARN MORE FROM A WATER-FURNACE EXPERT AT [WATER-FURNACE--DOT--COM](http://WATER-FURNACE--DOT--COM).
