## CHILDREN'S HEALTH

ABOUT EIGHT IN EVERY THOUSAND INFANTS ARE DIAGNOSED WITH A CONGENITAL HEART DEFECT—OR C-H-D. HERE'S WHAT THEIR PARENTS SHOULD KNOW. FIRST, SURGERY OR HEART CATHETERIZATION CAN MEAN A NORMAL LIFE FOR MOST. NEXT, IT MAY BE BEST TO GO TO A HEART CENTER, HOSPITAL OR CLINIC THAT SPECIALIZES IN CARDIAC DIAGNOSIS AND TREATMENT FOR CHILDREN. THE AMERICAN HEART ASSOCIATION ADVISES TO SEEK CARE FROM BOARD-CERTIFIED PEDIATRIC CARDIOLOGISTS, CARDIO-THORACIC SURGEONS, INTENSIVE CARE EXPERTS AND A SKILLED TEAM OF NURSES AND THERAPISTS. VISIT [HEART--DOT--ORG--FORWARD-SLASH--C-H-D](http://heart-dot-org-forward-slash-c-h-d) FOR MORE RESOURCES.
