## HEALTH AWARENESS

ABOUT THIRTY-TWO THOUSAND AMERICAN CHILDREN ARE BORN WITH A CONGENITAL HEART DEFECT, OR C-H-D, EACH YEAR. THE VAST MAJORITY CAN BE HELPED BY SURGERY AND LEAD A NORMAL LIFE. THE AMERICAN HEART ASSOCIATION PROVIDES PREVENTATIVE TIPS FOR PARENTS EXPECTING A NEW BABY. PREGNANT WOMEN SHOULD TRY TO AVOID THE USE OF CERTAIN MEDICATIONS FOR SEIZURES, ACNE OR BIPOLAR DISORDER; RUBELLA OR OTHER VIRAL DISEASES; AND ABUSING ALCOHOL. SPEAK WITH YOUR HEALTH CARE PROVIDER IF YOU HAVE ANY CONCERNS. LEARN MORE ABOUT C-H-Ds BY VISITING [HEART--DOT--ORG--FORWARD-SLASH--C-H-D](http://HEART--DOT--ORG--FORWARD-SLASH--C-H-D).
