HOME HINTS

IT'S HOME IMPROVEMENT MONTH, AND WHEN IT COMES TO BEING COMFORTABLE, MANY HOMEOWNERS FIND THEY PREFER THE STRONG, SILENT TYPE—OF FAN, THAT IS. RECENT TECHNOLOGY MEANS MODERN HOME FANS CAN BE FAST AND EASY TO INSTALL, ENERGY-EFFICIENT AND PRACTICALLY SILENT. IN FACT, ONE COMPANY HAS INTRODUCED NEW VENTILATION FANS THAT WORK WITH BOTH NEW CONSTRUCTION AND EXISTING HOMES. THEY CAN BE INSTALLED UP TO SIXTY PERCENT FASTER IN RETROFIT SITUATIONS WITHOUT ACCESSING THE ATTIC. THE FANS FEATURE POWERFUL AIRFLOW, NEARLY SILENT OPERATION AND BRIGHT, EFFICIENT LIGHTING FROM TWO EIGHTEEN-WATT ENERGY STAR-QUALIFIED BULBS. TO SAVE ENERGY, TIME AND MONEY, SMART CONTROLS LET YOU TURN A MULTISPEED FAN ON HIGH FOR MAXIMUM HUMIDITY AND ODOR VENTILATION AND SET THE AMOUNT OF TIME IT WILL RUN BEFORE RETURNING TO A PRESET, LOWER CONTINUOUS LEVEL. FOR FURTHER FACTS ON THESE NEW BROAN AND NU-TONE ULTRA SERIES VENTILATION FANS AND FAN-LIGHTS, VISIT B-R-O-A-N-ULTRA--DOT--COM AND N-U-TONE-ULTRA--DOT--COM.
